01 Business Basics

Company name

Fynbos Creative

What industry are you in?

Web design

Who is your target audience?

Age range, gender, interests, profession, income level, etc.

Sole proprietors and 1–5 person owner-operated small businesses in South Africa, primarily Pretoria/Gauteng. Non-technical, price-sensitive but not desperate, often 30s–50s, low-to-moderate digital literacy. Concentrated in personal care/beauty, trades and home services, hospitality, wellness/fitness, events, and social-commerce sellers moving online. They are the primary decision-maker (sole proprietor, no procurement process) and typically have little or no existing website, a stale/DIY one, or a broken one from a freelancer who disappeared.

Who are your top 3 competitors?

WebDevine (Pretoria) — packaged SME offerings, project-based, local Website Silk — no-contract retainer model, closest model overlap Bunnypants / Launch Digital — template-based lean builds, price-tier competition

What makes your business unique? (Your value proposition)

An affordable, done-for-you web presence with a low R1,200 flat build fee (not R15,000–R60,000 like standard agencies) and an ongoing monthly retainer — not a one-off project. A named, personal relationship (not a call centre or rotating account manager), WhatsApp-first communication, and a bundled partner network (photography, social media) at the higher tier. The only option in the market combining low entry cost with a genuine ongoing relationship.

What is the primary goal of the website?

■ Generate leads

■ Sell products

■ Build brand awareness

■ Provide information

■ Book appointments

02 Brand & Mood

Pick 3–5 words that describe how the website should feel

- | | | | |
|--|--|---|-------------------------------------|
| ☐ Bold | ☐ Minimal | ☐ Playful | ☐ Luxurious |
| ☒ Friendly | ☒ Professional | ☐ Edgy | ☐ Elegant |
| ☒ Calm | ☐ Energetic | ☒ Trustworthy | ☐ Innovative |
| ☐ Rustic | ☐ Futuristic | ☒ Warm | ☐ Other: |

Websites you admire (and why)

plato.coffee — editorial minimalism, confident whitespace, full-bleed imagery without heavy borders/cards
lovegreen.co.za — honest documentary-style photography, natural/organic feel, script+sans logo
lockupbugatti.com — full-screen cinematic video approach - with a warm, fynbos nature video

If your brand were a well-known company or public figure, who would it be?

A trusted local tradesperson or neighbour who happens to be good at websites — not a corporate agency. Think "the person everyone in the community recommends," not a Silicon Valley brand.

Overall tone

- | | | | | | | |
|----------------|----------------------------|---------------------------------------|----------------------------|---------------------------------------|----------------------------|--------------------------|
| <i>Serious</i> | ☐ 1 | ☒ 2 | ☐ 3 | ☐ 4 | ☐ 5 | <i>Playful</i> |

☒ Green

☐ Red

☐ Orange

☐ Yellow

☐ Purple

☐ Pink

☐ Black

☐ White/Neutral

☒ Brown/Earth tones

Colours to avoid

Bright/neon colours, cold blues or greys, anything that reads as corporate-tech (electric blue, sharp black/white contrast)

Light or dark theme preference?

04 Typography

What typography style fits your brand?

- ☐ Modern sans-serif ☒ Classic serif ☐ Bold display / headline ☐ Handwritten / script
☐ Minimal / clean ☐ Geometric ☐ Elegant / editorial ☐ Not sure — advise us

Do you have existing brand fonts?

- ☐ Yes (list below) ☐ No

Headings: Zilla Slab (Bold/SemiBold) Body: Work Sans Script accent (sparing use only): Alex Brush — for small warmth touches only, never body/headings

How important is readability vs. stylistic expression?

Readability first ☐ 1 ☒ 2 ☐ 3 ☐ 4 ☐ 5 Style first

Any fonts you specifically like or dislike?

Avoid anything overly geometric/tech-startup feeling (e.g. Space Grotesk was considered and rejected for this reason). Avoid anything that reads as corporate/SaaS.

05 Layout & Structure

Will you need to update content yourself after launch?

- ☐ Yes, need a CMS
- ☐ No, developer will update
- ☒ Not sure — advise us

08 Inspiration

Share 2–3 websites you like, and what you like about them

Site 1 URL:

plato.coffee

What you like about it:

Full-bleed, edge-to-edge imagery with no heavy card/border treatment; generous whitespace between sections; confident, wide-tracked uppercase headline typography.

Site 2 URL:

lovegreen.co.za

What you like about it:

Honest, real, un-styled documentary photography (not stock gloss); 3-panel photo mosaic hero structure that uses multiple real assets rather than forcing one hero image; script+sans logo lockup.

Site 3 URL:

bugatti.com

What you like about it:

The full-screen cinematic video treatment itself, transparent navigation floating over the hero media, solidifying on scroll

Any websites you dislike, and why?

Generic template-based SME agency sites with heavy jargon, stock photography, and hidden pricing behind "contact us" forms — exactly what Fynbos Creative is positioned against.

Anything else you'd like us to know?

This is a bootstrap, founder-led business — the site needs to feel warm and personal (a named person, not a faceless agency) while still looking professional and credible. Pricing must be stated clearly and early (R1,200 flat standard build fee, R349–R2,000/mo retainer tiers) — never hidden. The WhatsApp CTA is the single most important element on every page and must be visible without scrolling on mobile.

Thank you for completing this questionnaire — we'll be in touch shortly to discuss next steps.
